

REMARKS

The formula D added on page 3 finds support at page 3, paragraph 8 (see "Patent Document 4" WO 94/17045). The phrase "N-cyclohexyl-N-methylamino" has been deleted from page 20, lines 1 and 2 and added to page 19, second to last line to properly describe this substituent as a lower alkyl amino group rather than a phenyl amino group within the context of this paragraph. Example 25c on page 142, line 1 is a typographical error. Example 27c describes the correct synthesis of a carbamate compound appearing in the text.

The claims have been amended to correct the multiple dependency and to better conform to U.S. patent practice.

No new matter is believed to have been added.

Upon entry of the amendment, Claims 1-9 will be active.

This application is now in condition for examination on its merits and such action is earnestly solicited.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
